Abstract (en)

[origin: WO9324088A1] The present invention provides, in a first aspect, a force ventilated support system comprising an air support means together with a forced ventilation means. The invention also provides, in a further aspect, a multi-pressure air support system comprising an air support means together with multi-pressure zone means. The system of the further aspect may be used in combination with, or separately from, the system of the first aspect of the invention.
