Abstract (en)
[origin: WO9304328A1] A conveyor oven (10) for cooking food products using infrared radiation includes upper and lower etched foil heater (38 and 40) which are disposed above and below the upper flight of a conveyor belt (36) passing therethrough. The oven also includes a controller (18) for governing the speed of the belt (36), the time of exposure to infrared radiation, and a range of radiation wavelength between about 4 and 5 microns for cooking food in the oven (10).
