Abstract (en)

The shower-bath basin comprises a first portion (6) which is shaped to include a concave zone (4) that is delimited by a peripheral edge (3). Said first portion is arranged upon and joined to a second portion (7) which is shaped to include an upper peripheral fascia (8) adapted to support said edge (3) and blending into a floor-mount base (10) of said second portion (7). Said floor-mount base (10) comprises a plurality of alternately concave and convex sections having respective lower surfaces (11), which constitute an area for the basin to rest upon the floor, and upper surfaces (12), which are adapted to support said first portion (6) of the basin in correspondence of the bottom of said concave zone (4). <IMAGE>
