Abstract (en)
A reflective road stud comprises a hollow plastics body 11, a reflector support 19 integral with the body and projecting above the body, and a reflector 23 supported by the reflector support. The support 19 is deformable into the body 11 upon receiving an impact from either of two opposite sides of the road stud. Wiper means 24 may be provided for cleaning the reflector when the reflector is deformed into the body. The road stud may also comprise a housing 10 for receiving and locating the hollow plastics body. <IMAGE>
