Abstract (en)
[origin: EP0644613A1] The terminal strip has jumper connectors equipped with two contacts, which can be plugged in on a front face of a terminal (connection) block equipped with a row of other contacts. It is characterised in that the terminal block comprises a flat elongate block (3) having a front edge in which the row of contacts (20) is retained and on which are defined compartments (3) divided by partitions (3A, 3B) which project forwards and sideways. Application: connection and patching of telephone lines. <IMAGE>
