Abstract (en)
Universal palletizing machine comprising a main tower-like frame (1a) which is served by a conveyor (2) for feeding goods (11) to an elevated position at a central loading region of the tower, where there is a corresponding empty pallet (3); a horizontal guide (5) is closed in a loop and runs perimetrically around the frame (1a); a carriage (6) provided with a vertical spindle (7) can run on the guide (5), and a conventional roll of packaging film can be fitted on the spindle (7); a presser element (9) for stabilizing the goods (11) is furthermore provided above the tower. <IMAGE>
