Abstract (en)

[origin: EP0645308A1] The invention relates to a method and a packaging machine suitable for this, for unloading vessels from transport containers, with specific vessel features being taken into account. The vessels (1) located in the transport container (2) are unloaded from the latter and can be guided past a plurality of vessel delivery stations (II,III,IV), the individual vessels being releasable at a specific vessel delivery station as a function of one or more features, for example colour or height. <IMAGE>
