Abstract (en)
[origin: EP0645850A1] The invention relates to an ignition device for an internal combustion engine, comprising at least one elbowed bushing (duct) (5) arranged to receive a lateral snap-on cable (7) end connector (8). It comprises a stop (6), offset with respect to the axis of the end of the bushing, for allowing the cable connector to be snapped on in a first, fitting-on, angular position of the connector with respect to the bushing, and for preventing it from being disconnected in a second, use, angular position. <IMAGE>
