Abstract (en)

[origin: EP0646531A1] 1. Cigarette packs, namely especially hinge-lid packs and soft-cup packs, are designed so that the pack content, namely a cigarette group, is surrounded on all sides by an inner wrapping (11). This is to consist of paper, with a decorative print applied to the outside. Primarily for reasons of cost, the print is applied only to those surface regions of the inner wrapping (11) which are exposed when the pack (hinge-lid pack) is open or by virtue of construction. 2. The inner wrapping (11) is produced by being separated from a material web of paper which, depending on the design of the inner wrapping and depending on the folding construction, has print zones (34, 35) arranged at a distance from one another or a continuous strip-shaped print zone (43, 51) located at the edge. <IMAGE>
