Abstract (en)

[origin: EP0646537A1] The invention relates to a machine room module for an elevator and to a procedure for installing it above the elevator shaft. According to the invention, the various pieces of equipment carried by the base (2) of the machine room module are fixedly mounted in their proper positions as required by the elevator construction, and the base (2) is provided at least with supporting elements (20,26, 36) to support the base and to fix it on top of the elevator shaft (40). The module as a whole is positioned in the correct place in a horizontal plane above the shaft by means of positioning devices (38). <IMAGE>
