Abstract (en)
[origin: WO9400043A1] A carpet construction having an interposed layer of foam and a loop backing. The foam layer is manufactured with a fabric covering on both of its sides, the bottom covering having loops. A carpet backing is affixed to the foam sandwich using conventional methods. The foam sandwich can be secured to the carpet pile layer at the same time and with the same material that binds and seals the carpet pile layer. Alternatively, the foam sandwich can be manufactured, stored and later attached to the carpet which has previously been pre-coated with a binder.
