Abstract (en)

[origin: WO9400543A1] Described are liquid to pasty washing and cleaning agents containing anionic or anionic and non-ionic surfactants in quantities from 20 to 70 % by wt., and including as anionic surfactants 2 to 25 % by wt. of sulphonated fatty-acid glycerin esters. Such washing and cleaning agents suffer no loss in washing performance compared with liquid to pasty washing- and cleaning-agent formulations usually containing surfactants. The invention enables alkylbenzene sulphonates to be completely or at least partly replaced. Preferred agents contain as anionic surfactants a mixture of sulphonated fatty-acid glycerin esters, fatty-alkyl sulphate and fatty-acid soaps or a mixture of sulphonated fatty-acid glycerin esters, alkane sulphonate and fatty-acid soaps.
