Abstract (en)

[origin: EP0647930A1] Information slide card provided with a pop-up, comprised of an envelope formed by a back cover sheet and a front cover sheet in which the pop-up is included, an inner sheet disposed between the front cover sheet and the back cover sheet, which inner sheet is partially slidable out of the envelope, which inner sheet, between two parallel free side edges has a width greater than the width between the free side edges of the pop-up included in the front cover sheet, such, that the material of the front cover sheet adjacent to the pop-up covers the free side edges of the inner sheet, and further the inner sheet is connected to the pop-up, such, that when the inner sheet is slid in the envelope the pop-up is folded up and elevates from the envelope, while the connection between the inner sheet and the pop-up is formed by a fold line, and method for manufacturing this information slide card. <IMAGE>
