Abstract (en)

[origin: WO9308357A1] One end (28) of one of the glazing bead portions (21) is spaced from its respective frame member (11) at one and preferably both of the corner joints (15, 16) between that frame member (11) and the adjacent frame members (13, 14) so as to define a recess (23) between the glazing bead portion (21) and its respective frame member (11) at this corner region (15, 16) and through which a part of the glazed unit is exposed; and in which a decorative infill panel (24) is located in the recess (23) so as to cover the exposed part of the glazed unit (19) and also to provide a decorative corner effect with the glazing bead portion.
