Abstract (en)

[origin: EP0649620A1] The invention relates to linen 1 for beds, sitting and/or lying furniture, in particular a bed or cushion cover, composed of a patterned and/or printable natural-, synthetic- or mixed-fibre single fabric of warp and weft threads. In order to have in particular variably usable linen, the latter is designed as reversible linen usable on both sides. Either the left-hand or the right-hand single-fabric side is designed for summer or winter use, the single-fabric side 4 for winter use containing at least 50% of roughened weft and/or warp threads and the single-fabric side 3 for summer use containing at least 50% of smooth weft and/or warp threads. <IMAGE>
