Abstract (en)

[origin: EP0651228A1] Armour module of the type comprising a casing (1) surrounding a stack of armour elements, this module being intended for protecting a vulnerable structure, characterised in that it includes a set of spacers (7, 15) applied on each internal face of the casing (1) in order to define a free space, between the stack and the casing, receiving an injectable or pourable wedging material (13) which can be polymerised in situ. The invention applies, for example, to the protection of vehicles, boats, aircraft and stationary structures. <IMAGE>
