Abstract (en)

A post card with a decoration sticker and a method for production of the post card. The sticker of the post card has an excellent decorating effect and an improved durability and is reusable, while the releasable mount paper printed with post card form may be used as a post card. One side of the mount paper is printed with figures or letters, while the other side is printed with a post card form. A release film layer is formed on the one side of the mount paper. An adhesive material layer is formed on the release film layer of the mount paper in predetermined figures through a silk screen printing. The adhesive material layer is heated so as to form a base layer on the adhesive material layer. A color print part is formed on the base layer by separately printing colors on the base layer using color print inks while carrying out a heat treatment after every color printing. <IMAGE>
