Abstract (en)

[origin: WO9427019A1] The invention relates to a connector for plate-like wall components (3, 8) in this case glass panes, in particular, with which there is no need for costly glass cutting. Here, only drillings are rather made inside the glass panes into which a connector half (10, 22) is fitted on each side. The connector halves are secured together by a screw (23).
