Abstract (en)

[origin: EP0652332A1] In order to facilitate the mounting and, if appropriate, demounting of insulating panels (1) made of thermally insulating and, if appropriate, sound-insulating materials, with a tapering end (11) and with another end (10) which opens outwards, in particular along oblique surfaces (6), the last-mentioned end is provided inside with a cutout (2) which merges into at least one locking lug (8). The tapering end (11) exhibits a locking part (4), of which the greatest width is greater than the width of a narrow point in the region of the transition to the relevant oblique surface (5) and is greater than the width of the narrow point in the region of the locking lug (8). <IMAGE>
