Abstract (en)
[origin: EP0652474A1] A colour-photographic silver-halide material of the negative type in which at least one silver-halide emulsion layer contains a compound of the formula A-B-(T1)m-(COUP-D)-(T2)n (I), where A is a ballast radical, B is the radical of a compound which reacts during development with elimination of (T1)m-(COUP-D)-(T2)n, T1 and T2 are time-control groups which can be eliminated during development, m and n are 0 or 1, COUP is the radical of a tetraequivalent coupler, and D is a group with affinity to silver, is distinguished by improved sensitivity.
