Abstract (en)

The present invention is concerned with a granular detergent component having a bulk density of less than 400 g/l comprising from 20% to 50% by weight of aluminosilicate; and optionally up to 50% by weight of a co-filler; and 0.05% to 2% by weight of anionic surfactant, especially is C14-C20 alkyl sulphate. The low bulk density component is preferably mixed with other components such as percarbonate, silicate, layered silicate, carbonate, bicarbonate, sesquicarbonate, sulphate, citrate or mixtures of these.
