Abstract (en)

[origin: EP0653597A1] A compressor (2) for refrigerators or freezers, preferably for household use, provided with a tray (1) supported above the compressor cap, the inside (3) of the tray having a nonlowered edge (4) so as to permit assembly of the cap with a horizontal movement, and with at least two pipes (5, 7) issuing from the compressor and disposed in virtually radial positions with respect to the compressor, wherein the tray is provided with at least one pair of elastic hooked lengthening pieces (8, 10) adapted to engage against the respective pipes (5, 7) and at least one of the lengthening pieces (8) is provided with an end portion (9) bent into a curl. Furthermore at least one of the lengthening pieces (10) is made of heat-resistant material. <IMAGE>
