Abstract (en)

[origin: EP0653769A1] A rocker switch with a front protection cap, wherein the protection cap comprises two elements: one inside (16) framework shaped and made from rigid material, provided with teeth (18) for coupling to the body of the rocker switch, and one outside (17), made from soft material, preferably transparent, integrally coupled to said inside element (16) so as to form one only unit which is designed to be applied to the front of the switch in order to encase the switch and the housing in which it rocks. <IMAGE>
