Abstract (en)

[origin: WO9428758A1] Hair conditioning device. The invention concerns a steam apparatus for the conditioning and/or styling of hair, including: a housing with a gripping means (1); a hair strand rolling body (2) mounted on the housing and extending therefrom; a steam producing unit connected to a steam distribution means (20) opening into the rolling body (2); a means (10) for clamping a hair strand onto the rolling body (2), characterized in that: the steam distribution means is a tubular element (20) coaxially mounted in the rolling body (2) from the housing, said element comprising at least one steam distribution port (21); the rolling body (2) comprises perforations (4b) through which the steam passes. Steam curling iron.
