Abstract (en)

[origin: WO9403670A1] A method and device for joining together two or more articles, such as sections of a fishing net, using a flexible cord (10). The cord is wound at least twice around at least a part of the articles to form a knot (19). In order to form a taught joint, the knot is influenced by mechanical means (11; 21) to create a tension in the knot of the order of 1000N or more.
