Abstract (en)
[origin: EP0654239A1] Display hanger of flat construction (1) comprising a hook part (2) and transversely spaced means (3, 4) for holding said article (5), and comprising two parallel arms (7, 8) defining between themselves a cavity (11) in which the article (5) can be inserted and an intermediate arm (10) between said arms (7, 8). The intermediate arm (10) is generally parallel with said arms (7, 8) and defines with the second of said arms (8) a slot (13) communicating with said cavity (11). A guide means (15) is provided in said cavity in order, especially when the article (5, 6) hanging on the hanger is pulled so as to remove it from the hanger, to guide the article in the direction of said slot and away from the free end (12) of said intermediate arm (10). <IMAGE>
