Abstract (en)

[origin: EP0654297A1] In this device a leakproof receptacle (11) is equipped with at least one delivery conduit (12) and with an orifice (14) and includes an agitator (515) entirely contained in the receptacle (11). This allows products of a high viscosity to be mixed without excessive heating and without leakage, by virtue of the exclusive use of static leakproofing. Use for mixing viscous and/or fluid products at high pressures. <IMAGE>
