Abstract (en)

The present invention provides a package which is suitable for mess-free handling, easy pouring and secure storage, and which additionally can be easily refilled from a lightweight container. The refillable package (10) of the present invention comprises three elements: a. a rigid or semi-rigid container (12) having an aperture (80) in its surface for refilling said package; b. a transition collar (14); and c. a closure (16). The transition collar covers the aperture and is releasably attached to the container in the region around the aperture. The transition collar further comprising a pouring orifice (50), which is covered by the closure the closure being releasably attached to the transition collar in the region around the pouring orifice.
