Abstract (en)

[origin: EP0654554A1] Apparatus for the automatic loading of a machine for sewing gussets on knitted garments of the panty-hose type, comprising: - a tubular head (100) for supporting the body of a panty-hose, equipped on the inside with an annular electrical resistor (9) and with a conduit (8); - means for the vertical displacement of the head (100) alternately in both directions, with an actuating cylinder (101) having a vertical axis; - means for the alternate displacement of the head (100) about a horizontal axis, with a cylinder (104) fastened to the carriage (103) and with a lever (106) connected to the rod of the cylinder (104) and to the head (100); - a collar (110) mounted above and coaxially with the head (100); - means for supporting the panty-hoses on each head of the machine for sewing gussets, with as many counter-cones (25), each of which is slipped onto a tube (26) of vertical axis, to the lower end of which a corresponding head (27) of the machine is fastened; - means for grasping the panty-hose, with a normally closed elastic annular gripper (31) for each head (27), which gripper is supported by a corresponding counter-cone (25); - fixed cam means (400) for controlling the respective raising and lowering of the said counter-cones (25); - pneumatic means (450) for activating the said grippers (31); - means for cutting and discharging the waste produced during the operation of trimming the said perineal hole, with an electric resistor (40) and a suction tube (38). <IMAGE>
