Abstract (en)

[origin: EP0654717A1] The invention relates to a timepiece having a body or support on which may be held, in a removable manner, a detachable piece. The invention also relates to a method for fastening this piece to this body or support. The timepiece is characterised in that the means for fixing the detachable piece to the body or support consist of at least one revolving lock (10) which is anchored permanently into the actual material of the body or support (2) with axial immobilisation provided by this material. <IMAGE>
