Abstract (en)

An improved color picture tube (8) includes an evacuated envelope (10) having a rectangular faceplate panel (12). The panel includes a viewing screen (22) on an inner surface thereof and a mask-frame assembly (24, 25) mounted therein. The mask-frame assembly includes a shadow mask (24) attached to a peripheral frame (25). The improvement comprises the frame comprising a box-like enclosure that extends around the periphery of the mask. The frame material has approximately the same thickness as does the shadow mask material. <IMAGE>
