Abstract (en)

[origin: WO9404116A1] A hand-held, portable steamer device (220) for treating skin surfaces includes a housing (222), and a modular liquid reservoir (228) in the housing (222). A steam generator is provided in the housing (222) for converting a liquid to a vapor and for supplying the steam or vapor to the skin surfaces to be treated. There is a wick (234) in the housing (222) for supplying liquid from the liquid reservoir (228) to the steam generator. Preferably, the steam generator is detachably attached to the modular liquid reservoir (228).
