Abstract (en)

[origin: WO9404541A2] This invention describes both known and novel compounds, some of which are protein kinase inhibitors, that may be combined with taxol type compounds. The combination of disclosed compounds plus taxol type compounds exhibits powerful synergistic effects and the combinations are useful in the treatment of cancer. The novel compounds and their synthesis are described. A compound of formula (I), above, is described wherein R1-R8 represent various substituents.
