Abstract (en)

[origin: DE4226855A1] Described is a manipulator with an inspection device (8) for inspecting the clamping strips (4) in the tube-turn region (6) of a steam generator (2). The manipulator (10), which is made up of several elements (12, 14, 16), has a pivoting arm (16) which is curved to match the curvature of the tubes in the tube-turn zone (6). The inspection device (8) is mounted at the free end of the arm (16) so that it can be extended in the longitudinal direction.
