Abstract (en)

[origin: GB2269611A] A roofing batten (2) formed as a unitary moulding of plastics material has tile fixing means (4) comprising latch elements (20, 22) for engaging, in use, with the head lap portion of an associated tile in a first row of such tiles and a hook element (30) for engaging, in use, with the sidelock portion of an associated tile in a second row of such tiles overlying said first row. The battens (2) are provided with conventional coupling means at their ends for enabling the assembly thereof along a roof. <IMAGE>
