Abstract (en)
[origin: WO9405550A1] Method for storing and/or transporting fresh goods (1), for example fruit and vegetables, in which a closeable wrapping, bag or sack (8), for example of plastic sheeting material, is filled with fresh goods, in which the bag or sack is then closed and sealed, in which a gas mixture which inhibits the decay of the fresh goods is introduced into the inside of the bag/sack via a first place (16) on the bag and in which the air and gas driven out of the bag pass out via a second place (17) and in which the gas mixture is continuously fed into the bag/sack during storage by means of external supply (21, 19) to the stated first place (16) and evacuated from the stated second place (17) and/or that the bag is sealed during transportation at the stated first and second places.
