Abstract (en)

[origin: EP0657584A1] Device for fixing a glare foil on a metal safety barrier placed on the central reservation separating motor vehicle traffic lanes. It consists of a support plate (2) which can be secured to the rear of a metal barrier (1, 6) by means of a flange (3, 3') consisting of a wire (30), the ends (31, 32) of which abut, and which is folded in such a way as, on the one hand, to exhibit some degree of transverse and longitudinal elasticity and, on the other hand, to be capable of matching at a distance the rear contour of the said barrier (1, 6), while covering its longitudinal edges (13, 14) above and below the said support plate (2), passing on either side of the latter. <IMAGE>
