Abstract (en)

[origin: EP0657903A1] The coil core (2) described includes means (24A, 24B, 24C, 25A, 25B, 25C) for guiding the coil wire (3) making it possible to lead the ends of the wires of the coil (30) directly above metal tracks (41, 42) of one or more electronic components (4) fixed to the core. In this way, it is possible to use a simplified winding machine (1), that is to say one not including mobile means for guiding the wire, and the movements of the winding head (12) of which are thus simplified. <IMAGE>
