Abstract (en)  
[origin: WO9405839A1] A heald control system for moving individual heald (11) rods to an upper or lower shed position, the system including a plurality of stiff heald rods (11), at least one motive assembly (31) oscillating between upper and lower positions corresponding to said upper and lower shed positions, the motive assembly (31) including for each individual heald rod (11) selectively actuatable engagement means (63) which on actuation engages the heald rod (11) to connect it to the motive assembly (31) and cause it to be moved toward one of said positions.
