Abstract (en)  
Each means of guidance between each side wall of the cabinet or rack and each side panel of the drawer consists of an upwardly sloping guide groove (5) which is open at one end and closed at the other end and is provided with protrusions (6) over at least part of its length and behind which guide pins (9-10) are hooked in order to lock the drawer (12) with which they work in conjunction into a chosen withdrawn sloping or horizontal position, where the guide groove and the guide pins engaging in it are installed on the inner surface of the side wall (3) of the cabinet (1) and the side panel of the drawer (12). <IMAGE>
