Abstract (en)

[origin: EP0658661A1] This rail (1) is characterised in that it has at least one built-in skirting board (face board) (20A, 20B) to form a non-detachable single-piece assembly with this rail, connection between the skirting board and the rail being by means of articulation means (21, 22) able to make it possible for the skirting board to be folded up and down with respect to the vertical branch (4 or 5) of the rail (1) in order to make the means (23) for immobilising the panel (6) accessible, while allowing these, and the rail, to be hidden. <IMAGE>
