Abstract (en)

[origin: EP0658671A1] The invention proposes a case (10) for the remote control of an electrical installation, of the type comprising a case body (12, 14), the wall (26) of which delimits an internal receptacle (18) provided for receiving various components, and of the type comprising at least one control button (30) which extends through an orifice (28) formed in a portion of the wall (26) of the case and on which a user can exert a controlling pressure force in a direction substantially perpendicular to the plane of this portion of the wall (26) of the case, counter to elastic means for returning the button into the released position, characterised in that the button consists of a plate (30), the contour (32) of which is substantially complementary to that (34) of the said orifice (28), to the edge of which it is connected by means of a plastic film (42, 44). <IMAGE>
