Abstract (en)

[origin: EP0659365A1] The invention relates to a device for preparing, in a metered manner, and dispensing a cosmetic product, particularly a product for colouring (tinting) and bleaching hair, which is obtained by mixing two liquid, creamy or gel-form constituents just before use. It comprises a transparent cylindrical body (1) with a flexible wall, equipped at its two ends (2,3) with identical external screw threads (4,5) and two removable end caps (8,9) equipped with identical internal screw threads (12,13) each capable of interacting with any one of the external screw threads of the body, the wall of the said body being equipped with at least one series of graduations, over the length of the body, one of the caps (8) including a dispensing means (14), the other cap (9) including an orifice (17) equipped with a non-metallic valve (18) with automatic closure. <IMAGE>
