Abstract (en)  
A folding box useful for tidying-up and storing goods, which consists of the base (1) where the two sides (3) bearing handles (8), as well as the shorter front (4) and the larger back (2) sides are attached with the assistance of the support plates (7,7a,7b,7c). The sides of the box are fastened to each other with angular fixtures (5,6). All sides consist of a main part and a smaller part (10,10a,10b,10c) connected to the main part with a strip of membrane (11,11a,11b,11c) and to the base with another strip of membrane (12,12a,12b,12c). The small parts of the sides bear contact pads (13,13a,13b,13c) that enable their attachment to each other and which close the existing gaps. The sides also bear aeration holes (9). The base can also bear such holes. The box is made of plastic or any other suitable recyclable material (wood, cardboard etc.). <IMAGE>
