Abstract (en)
[origin: EP0659919A1] In a weft-thread brake (2) for an air-jet weaving machine, a controllable drive means (23, 25) is provided for at least one thread-guide element (20, 21) causing a deflection of the thread, there being provided between the drive means and the thread-guide element a transmission means (24) which allows a relative movement. <IMAGE>
