Abstract (en)

[origin: EP0659952A1] The invention relates to a steel spiral staircase with central tube. Short load-bearing elements, which preferably comprise plates (9) and welded-on transverse webs (7, 8), are welded on a central tube (1). The entire assembly is then provided with corrosion protection as one unit, in particular it is hot-galvanised. Stairs (10), which are likewise provided with corrosion protection, are mounted on site. <IMAGE>
