Abstract (en)  
[origin: EP0659953A2] The device serves for fitting wall claddings (16) or the like and has means for fastening on a wall (10). It has a horizontal wall fastening rail (22) with a horizontally running central web (32), from whose one end a wall fastening flange (34) projects vertically downwards, while a suspension flange (36) which is remote from the wall projects vertically upwards from its opposite end, and further has a carrying rail (30) which can be fitted on the rear side (28) of the wall cladding (16) or the like and exhibits a cross-sectionally horizontal central web (38), from whose one end a vertical fastening flange (40) projects upwards and from whose other end a carrying flange (42) engaging behind the suspension flange (36) projects downwards. <IMAGE>
