Abstract (en)

[origin: EP0660067A1] Device for the manual unloading of a munition (18) engaged in the chamber of a weapon mounted in a turret (2) of an armoured vehicle, characterised in that it consists of a means (14) for receiving munitions (18) which is fixed to the turret cage (6) by means of a slide ensuring an unloading position inclined in the extension of the weapon and a storage position, in which the munition is substantially vertical and spaced from the weapon. The receiving means (14) consists of a plate (17) and of two half-shells (16) connected by a quick-fastening means.
