Abstract (en)
[origin: EP0660206A2] In an electromechanical time switch having a programmable control disc (16) provided with control rudders (20), in a housing of compact design, and having a device for latchable (latch-down) mounting on so-called standardised supporting (mounting) rails, in particular for installation in distribution systems (assemblies, boards), the housing is provided, in particular on the side of the housing (2), with a housing section (19), particularly in the shape of a circular cylinder, by means of which the control disc (16) arranged and mounted in the housing can be operated and programmed manually from outside. <IMAGE>
