Abstract (en)

[origin: WO9406632A1] In a device for supplying printing plates (27, 67) to a plate cylinder (2) and for carrying away the same from the plate cylinder (2), the problem consists in reducing the number of rollers or accessories for supplying, removing and pressing the printing plate. According to the invention, a roller mounted by means of positioning elements so that it can be swivelled into at least three predeterminable positions and adjusted with regard to the plate cylinder.
